Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

Page 2, line 15, the term "U.S. Patent No. 7,148,162" should be changed to –
6,148,162—

Page 6, line 25 contains blank and should be filled in with a patent number.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3, 5-7, and 9-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Lubawy et al.

Lubawy et al disclose an imaging device loaded with a printing media 24 (Col. 4, line 18) and method comprising reading a single marking 40 having data from one side of the print media to provide an orientation indication of the print media with respect on how the print sheet is loaded in the imaging device and a set of media parameter information corresponding to the sheet of print media (Col. 4, lines 28-45); and

Art Unit: 2852

configuring the imaging device to form images on the sheet of print media based on a portion of the data (Col. 5, lines 53-57).

Lubawy et al further disclose the data is imprinted as a single mark on each edge of the print media such that the imaging device senses the data independent of any particular orientation of the print media (Col. 45-55); the data is a single barcode imprinted on each edge of the print media (Fig. 1).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 4, 8, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lubawy et al in view of Blackman et al.

Art Unit: 2852

As discussed above, Lubawy et al disclose every aspect of Applicant's claimed invention except for the orientation indication that can identify whether the sheet of print media is face-up or facedown.

Blackman et al disclose a print media detection device 77 (Col. 6, line 15) for detecting a single marking (i.e. bar code, Col. 6, line 29) having an orientation indication that can identify whether the print media is face-up or facedown (Col. 6, lines 20-30).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the print media detection device of Blackman et al to the image forming device of Lubawy et al so that a proper print media orientation can be detected.

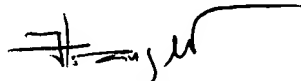

Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoang Ngo whose telephone number is (571) 272-2138. The examiner can normally be reached on 6:00am - 2:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Arthur Grimley can be reached on (571) 272-2136. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
